Educator Notes — RTI, Accommodations & IEP

Font note: All worksheets are typeset in the OpenDyslexic font, designed to reduce reading errors for dyslexic learners.

Timed vs. untimed use

Use **untimed** for practice and building fluency. Use **timed** sessions (e.g., 5–10 minutes per page) only when you want to assess speed; avoid timed work until the student is comfortable with the operation.

Suggested session length

5–10 minutes per worksheet page is usually sufficient. One page (6 problems) per session reduces fatigue and supports focus for learners with dyslexia or dyscalculia.

Accommodations

- Allow use of number lines or manipulatives if in the student's plan.
- Provide extra space or use the answer boxes for large-print writing.
- Read directions aloud; allow oral response and scribing if needed.

RTI (Response to Intervention)

These worksheets work well for **Tier 2** small-group practice and **Tier 3** individualized drill. Use the Progress Tracker for each set to record completion and scores. Easy sets (1–2 digits) suit Tier 2; Medium/Hard can support Tier 3 when appropriate.

IEP applicability

Goals for computation fluency, place value, or fact recall can be supported with this bundle. Document which sets and pages are used, and attach Progress Tracker pages to show progress over time.

Dyslexia Math Drill – Set A1 (Addition Easy)
